MOBILE SCREW AIR COMPRESSOR

DAF-AIR-CU-600-17

Cummins-powered mobile screw air compressor delivering 600 CFM at 245 bar, built for construction, mining, sandblasting and pneumatic tool supply on site.

AIR DELIVERY	PRESSURE	POWER	WEIGHT
600 CFM	**17** bar	**176** kW	**3000** kg

TECHNICAL SPECIFICATIONS

Model No.	DAF-AIR-CU-600-17
Compressor model	BHE180L/1.58
Compressor brand	BSC
Air end type	Two stage
Air delivery	600 CFM / 16.8 m^3/min
Working pressure	17 bar / 245 psi
Power	176 kW / 240 hp
Engine model	6CTA8.3-C240
Engine brand	Cummins
Air outlet	3/4" × 1 + 1-1/2" × 1
Fuel	Diesel
Fuel tank	300 L
Skid dimensions (L×W×H)	2800×1560×1670 mm
Wheel-mounted dimensions (L×W×H)	3650×2120×2265 mm
Weight	3000 kg

Air delivery and working pressure per ISO 1217. Dimensions, weight and fuel tank capacity are typical values for the standard configuration — final figures are available in the model technical drawing; please request the current version before ordering.

KEY FEATURES

- Cummins diesel engine, reliable for continuous duty
- BSC screw air end, two stage design
- Skid and wheel-mounted configurations available
- Large fuel tank for extended running time
- Multiple air outlets for simultaneous pneumatic tools
- Weatherproof enclosure with easy service access

TYPICAL APPLICATIONS

- Construction and road works
- Mining, quarrying and tunnelling
- Sandblasting and pneumatic tools
- Pipeline, geothermal and drilling
- Emergency and standby compressed air

WHY DAF POWER

- Compressor manufacturer since 2009
- ISO 9001 certified production
- 100% load-tested before shipment
- OEM / ODM configuration available
- Export support to 100+ countries
